

QUALITY POLICY

For 25 years, we have been supplying and protecting people at work with technical and sustainable knitwear that we develop and produce in France.

We are committed to maintaining the trust placed in us by our customers, and their satisfaction is one of our top priorities. That's why we've made product quality, comfort and durability our key considerations.

We have also integrated a sustainable and socially responsible dimension, which is now an integral part of our practices and our mission. Our products are certified Origine France Garantie®, we use recycled and recyclable materials in every new product development, we have been complying with ISO 26000 commitments since 2015, and we meet REACH and OEKO-TEX requirements for all our products.

We need to formalise our practices further and bring them into line with listening to and meeting the expectations of our customers and stakeholders. The ISO 9001 management approach should enable us to achieve this objective. To this end, I have entrusted this mission to our Quality Manager. His role is to ensure that we keep up the momentum of this ambitious project, which will be a further key step in our development.

In addition to formalising and improving our practices, this continuous improvement process we are embarking on should enable us to consolidate our current markets, to continue our development despite the tensions and strong fluctuations we are encountering in our sector of activity, and to support us in the economic, ecological and societal changes to which we are going to commit ourselves with our Partners and our Customers.

Emmanuel LABRIET
Directeur Général
